ACTIVECAPTAIN® COMMUNITY

PRODUCT OVERVIEW:

Now, users of the ActiveCaptain Community can add up to 3 pictures when reviewing points of interest. Reviews help all boaters make informed decisions on the water. Photos can be viewed on the ActiveCaptain app and website.

The large community of ActiveCaptain users shares their experiences to make all of our boating adventures safer, less expensive and more enjoyable. Use the community of fellow boaters through the ActiveCaptain app, ActiveCaptain Community website or compatible Garmin chartplotters for reviews of marinas, boat ramps and other points of interest on the water — or leave your own. Plus, it's free to join.

The free all-in-one ActiveCaptain app provides a powerful connection to your compatible Garmin chartplotter, charts, maps and the community for the ultimate connected boating experience. Wherever you are, you'll have unlimited access to your cartography, the ability to purchase new maps and charts, and access to the Garmin Quickdraw™ Contours Community. Stay connected with smart notifications on your compatible chartplotter screen. Even plan a trip or pre-fish a lake, and ActiveCaptain will automatically sync with your compatible chartplotter.
